

Sharing Seven

What to do...

1. We're going to share 7 things with teddy.
2. Below are 7 items inside 3 different shapes. They show the pairs of numbers that add up to make 7 for example, $3 + 4$, $2 + 5$ and $1 + 6$.
3. Colour the items in each space in a different colour to show that they are part of the sum that adds to 7.
