

# spinner challenges

## Before we get started

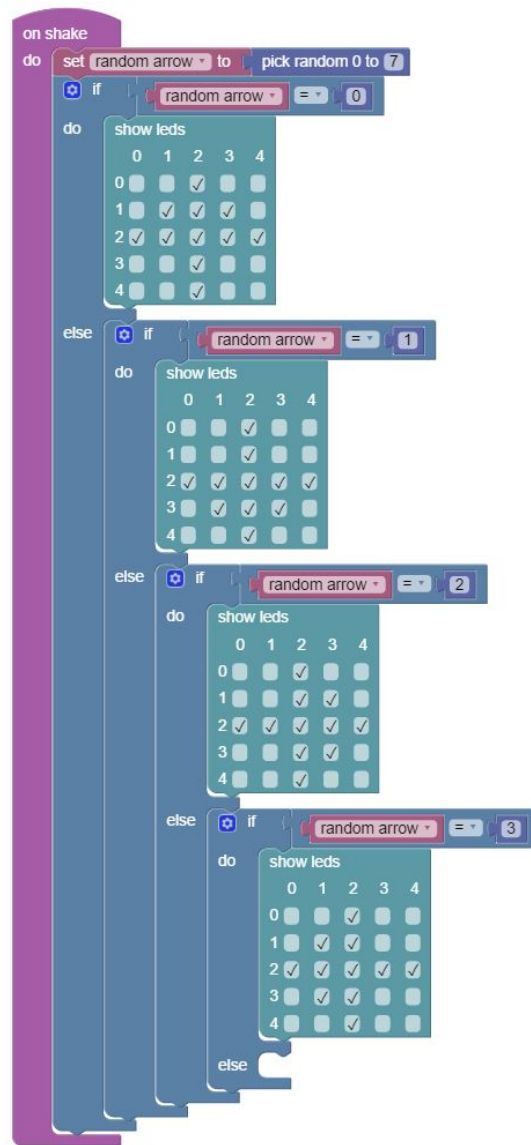

Complete the following **guided tutorial**

(<https://www.microbit.co.uk/blocks/lessons/spinner/activity>), your code should look like this:

## Challenge 1

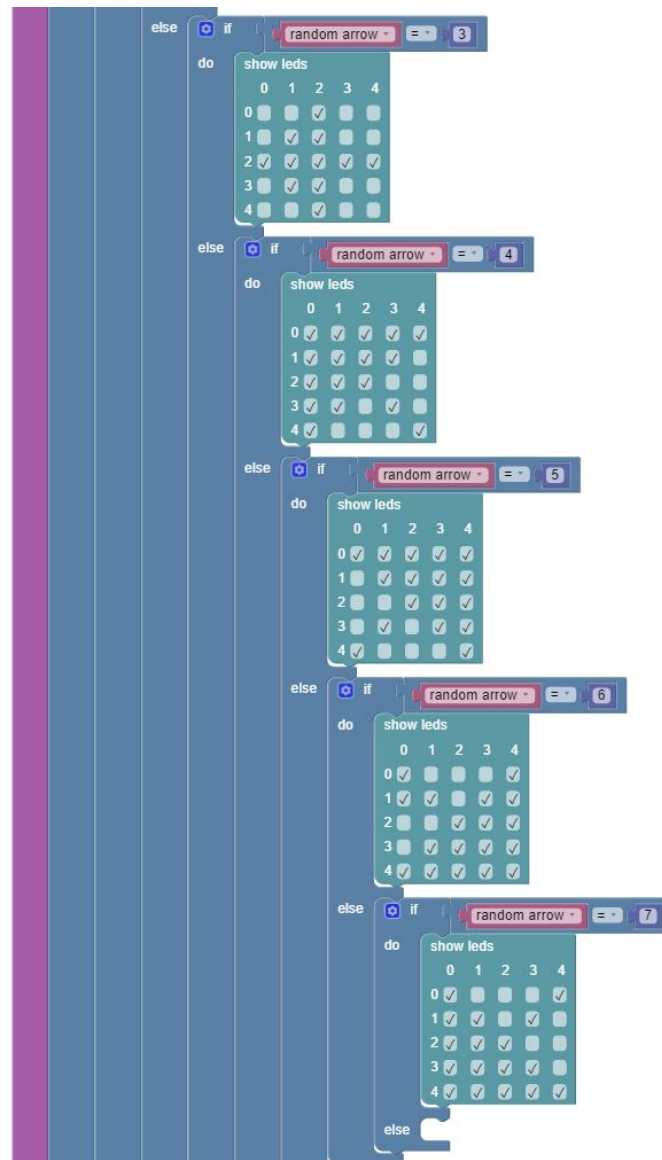

Modify the random number generator so that it can include new arrows we will create in the next challenge.

- Do **not** run the code yet because it will not work until you have conditions for every random number.

## Challenge 2

Let's add four more arrows that point diagonally.

- Run your code to see if it works as expected

## Challenge 3

Add some other arrows if there are more than 8 players.
