

Handful of Money

What to do...

1. First of all, draw around one of your hands, keeping your fingers together.
2. Find some coins and use them to cover the drawn outline of your hand.
3. Add up the value of the coins that cover your hand outline to see how much your hand is worth.
4. The more coins you can get in your hand outline and the higher the value of each coin the more your hand will be worth!

$$9 \times 1p = 9$$

$$13 \times 2p = 26$$

$$10 \times 5p = 50$$

$$3 \times 10p = 30$$

$$1 \times 20p = 20$$

The coins add up to £1.35
